## Case Study: Pearl Group

### PEARL GROUP

**Profile:** A household name in both general insurance and life assurance. Pearl Assurance continue to manage over £13 billion of funds for 2.6 million policyholders.

**Brief:** The client required the delivery of new customer based data warehouse sources, to include logical and physical modelling and design and development of data transformation routines.

**Services:** The project deliverables comprised the integration of new customer based data warehouse sources into the Pearl General Business data warehouse. The technical design and development aspects of the project was conducted entirely by Quantum consultants, working in conjunction with senior Actuarial and Business personnel and according to stated business criteria and requirements. The project deliverables were fully tested and implemented as production data sources for regulatory reporting purposes, and were of ongoing commercial value to the Company.

**Technologies:** SAS 6.12  
MicroStrategy 7.1  
MS SQL Server 7  
DB2
